EDUCATION

Georgia Institute of Technology

PhD in Machine Learning

M.S. in Computer Science

2020 – Current

GPA: 4.00 / 4.00

Johns Hopkins University

B.S. in Applied Math & Statistics

B.S. in Biomedical Engineering

Graduated 2019

GPA: 3.84 / 4.00

SKILLS

Programming: Python, R, Java, SQL, MATLAB

Machine Learning: Time Series, Self-Supervised Learning, Contrastive Learning, Transformers, Physiological Sensors

AWARDS

* National Science Foundation Graduate Research Fellowship

* Georgia Tech Presidential Fellowship

* Intuitive Surgical Best Deep Learning Project Award

* Multiple Business/Design Competitions Awards (1st in JHU FFU, 1st in ASAIOfyi Design, 3rd in JHU BPC, JHU SIF grant)

EXPERIENCE

Rehg Lab at Georgia Tech

PhD Student / Graduate Research Assistant

Atlanta, GA

Aug 2020 – Current

- First author published in ICLR, NeurIPS, INSAR
- Research interests include developing self-supervised learning methods for time-series using transformers with applications in healthcare and to physiological sensors
- Projects include designing a novel SOTA time-series contrastive learning method with conditional reconstruction accuracy to identify positive/negative pairs, pulsative physiological signal imputation with transformers, and disease progression modeling with ct-hmm's

Systems & Technology Research

Machine Learning Researcher

Boston, MA

Jan 2020 – Aug 2020

- Conducted machine learning research for identifying vulnerabilities in speech-processing programs with reinforcement learning and representation learning techniques
- Worked on frontend UI and backend data retrieval, visualization, and unit testing

Medtronic plc

Data Science Engineer Contractor

New Haven, CT

May 2019 – Dec 2019

- Predict lung cancer recurrence from tabular clinical data
- Utilized survival analysis with Kaplan-Meier curve visualizations to identify cancer recurrence risk factors

BioSwift Biomedical Engineering Design Team

Former Chief Executive Officer and Co-Founder

Baltimore, MD

Aug 2018 – Dec 2019

- Designed inhaler attachment to assist pediatric asthmatic patients
- Secured over \$10,000 in funding, including from the Johns Hopkins Student Initiatives Fund
- Won 1st place in the 2019 ASAIOfyi Student Design Competition, 1st place at Fall 2019 Johns Hopkins FastForward U Spark Accelerator Competition, 3rd place at 2019 Johns Hopkins BPC

PERSONAL PROJECTS

Modeling A Transferable Histopathological Image Analysis System

Dec 2019

- Developed a deep clustering representation learning method for histopathology images
- Won Intuitive Surgical Best Deep Learning Project Award (\$800 cash prize)
- Press Release:
 - <https://www.cs.jhu.edu/2020/01/28/deep-learning-course-prepares-students-for-success-in-ai-careers/>
